NOSOK™

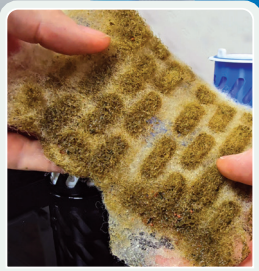
- **Easier To Clean** Than a Filter Sock
- **More Effective** Than a Filter Cup
- **Less Complicated** Than a Fleece Roller.

Aquarium maintenance is one of those tasks you have to do, but nobody loves washing filter socks. The alternative is the NOSOK™ by Vivid Creative Aquatics.

Add the NOSOK™ to your aquarium filtration and never wash a dirty filter sock again. It really is that simple.

Not a Filter Sock - Not a Filter Cup

Wrap the Filter Core with inexpensive filter floss and create filter sock-like performance without the hassle of washing dirty socks. When the filter is spent, just toss the dirty floss and re-wrap it.



Effective filtration using just filter floss

Built-In Filtration - Right Out of the Box

The included heavy duty, nylon filter screen simply drops into the NOSOK™ filter cage for easy, no hassle filtration, right out of the box.

When it's time to clean the screen, it unrolls flat for an easy and quick rinse under running water.

The NOSOK lay-flat nylon screen is easy to clean

The Filter Core can be warped with inexpensive filter floss for easy-to-manage sock-like performance. It can also be wrapped with filter sponge or even a pre-cut poly filter for additional layer of filtration
